

HPP23-12

HYDRAULIC POWER PACK

THE PROFESSIONAL CUTTER'S PORTABLE POWER SOURCE

Kingdom Construction Products gas-operated power packs are engineered for continuous professional use and are optimized to deliver ideal flow and pressure to various types of hydraulic tools. A dependable, self-contained source of hydraulic power that offers superior cooling capacity. The engine-mounted hydraulic pump eliminates any misalignment and ensures the long life of the drive coupling. This series of power packs are functional with an ergonomic design that makes them easily transportable to any job site.
